PROFESSIONAL SUMMARY

Information Technology student with hands-on experience in backend and web application development using Python, Golang, and Flask. Strong understanding of database management, version control, and automation tools, with the ability to build efficient and maintainable applications. Familiar with SQL databases and scripting for process automation.

TECHNICAL SKILLS

Languages: Python, Golang, SQL, YAML, Shell Scripting

Frameworks & Tools: Flask, FastAPI, Pandas, Boto3, Git, GitHub

Databases: MySQL, MongoDB

Concepts: Backend Development, Database Design, Version Control

Soft Skills: Problem Solving, Analytical Thinking, Communication, Team Collaboration

PROJECTS

KisanSaathi – Smart Agriculture Platform with AI-Based Disease Detection

Tech Stack: React, JavaScript, Python, CNN, REST API

- Developed a web-based agricultural platform providing crop planning, weather forecasting, government schemes, farmer marketplace, and multilingual support for farmers.
- Built a CNN-based crop disease detection system that analyzes uploaded crop images and provides real-time disease predictions with preventive recommendations.
- Integrated machine learning services with the web application using REST APIs and deployed the solution on Render for scalable cloud-based access.
- Implemented responsive UI components, weather API integration, and region-specific agricultural advisory features to support informed farming decisions.

EDUCATION

Datta Meghe College of Engineering

Bachelor of Engineering (Information Technology)

Expected Graduation: May 2027

Airoli, Navi Mumbai

CERTIFICATIONS

AWS Cloud Practitioner Essentials

AWS Training & Certification

March 2026
